Little League World Series The Little League World Series is held every summer in South Williamsport, Pennsylvania, a suburb of the city of Williamstown, at the home stadium of the Williamsport Crosscutters professional baseball team. The tournament has been held at the Allegheny Ballpark since 2001, when it was known as the Wanamaker Mile. The 2012 WLWS site was moved to Big League Dreams Stadium in Williamsport, Pennsylvania because of the owners of the Wanamaker Mile, the Pittsburgh Pirates, wanting to build a new stadium adjacent to their current park. The Crosscutters are the current title holders of the Little League World Series. They won the LLWS in 2004 after being runner-up three times. In 2010, the Crosscutters won their first LLWS title in 42 years, also sharing the record for longest title drought since 1950. The LLWS is the oldest organized baseball tournament in the United States, founded in 1902 by Charles Comiskey. It is the largest organized youth sports tournament in the United States, with more than 3,000 teams. Downloads manager with HTML links extractor, Scheduler, FTP Client,PHP port scanner, Youtube URLs extractor, and FTP/FTPs server support. Downloads manager will silently checks your downloads and organize them into different categories such as completed,popped,rejected,skipped and failed. Automatic file management, you can easily delete expired files or move to different directory. You can also edit your links in the running documents. Download links are extracted from HTML documents of webpages and stored into database. The reason behind it is that you don't have to repeat your work for extracting links. You can also extract the links from MS Word documents and Excel spread sheets. If Links are found, they will be copied and marked to the database. PHP port scanner will check the port is open or not. You can easily know what's the IP address of your friends or your enemies, if it is open or not. Youtube Url has a limitation for extracting youtube URLs in html documents. You can extract other types of URLs like ftp,http,https etc. This software is designed in such a way so that whenever you are surfing internet you can save the page and the links you want by opening it in your browser.Downloads manager is very easy to use. The scheduler is essential for your downloads. Let's say, you want to download DVD movies. By running your scheduler you can get list of all downloaded movies and the link can be passed to downloads manager. Scheduler will automatically check if link on your list is valid or not. If it is valid, downloads manager will start downloading it and when it is done your scheduler will mark this link as "completed". It will have some limitations in that you can either add a link or check it. If a link is added you can schedule it. If you want to check a link you can select it and you can schedule it, it will appear as "completed" after your scheduler has checked it. You can check/uncheck the link from the scheduler as many times as you want. The following features of our software: ⬜ Simple interface ⬜ Language support: English,French,Portuguese,Czech,German,Spanish,Español ⬜ Schedule download ⬜ Web-scraping ⬜ Download URL from webpages ⬜ Time and date saving
