Let's explore steel structures with structural modeling and calculation software. See how to deal with... Typically, you want a multi-target model. They should be standalone so that you can easily switch between them. Structural modeling may not be the best choice if you don't know which use case is best for your model. Structural modeling does not give you an idea of what your system will do. However, if you want to make a choice, the structural approach will allow you to see the different uses and how they suit you.
