Whenever you need to update the whole work system or just a component of your system, you need to know that which software will be best at your disposal. Network updated software always have high potential for keeping you up to date of the newest bug fixes, updates, and new features. You can also ask for some free trial version to do so, and download the most suitable one for your system. Among all of these updating programs, you should have Prey. Its not just a matter of keeping the malware away from your system, but it is also about the ability to find the infected files to repair the damage that has been done by the malware. Here are some feature of Prey that will change the game and let you keep the system protected: 1. Update process is a piece of cake. The application itself is very simple and self-explanatory. The only feature that it has is to offer you the chance to have the updates automatically. If you do it manually, you should go to each directory one by one and read the list of files that will be updated. If you want, you can even keep the older version of the files at the same time. After updating each file manually, you should reboot your system and see if everything is fixed. If not, you can repeat the whole process. 2. It offers you the features of proxy, p2p, and dns. Proxy and p2p are very useful for using the internet and keeping the possible intrusion away from your system. DNS service means that all the information like ip address, etc. is accessible to Prey. 3. Disk scanning. This is the most important feature of the application. You can check the whole system from its database or anything that you need. You should be aware that Prey does not scan in the disks on your system or the cloud. The search for malicious code is limited to the directory of your system and not the storage. 4. Free download. Prey can be downloaded freely. There are no hidden charges and it can be installed on various operating systems. It can be downloaded from here. Preventing threats and malware is one of the essential topics that most of the computer owners are concerned with. You can install and use the Prey application on your system to protect it from computer threats. It can be useful for fixing the previous system in case you were infected with malware.
