How to Convert iTunes M4P to MOV File? Many people would like to convert iTunes M4P to MOV for exchanging or playing online but they have no idea how to convert iTunes M4P to MOV! So now you can convert iTunes M4P to MOV with a easy way. Here, I will share some tips to help you convert iTunes M4P to MOV with Ease.This invention relates to the non-contact detection of a target object. A known application of non-contact detection is the use of such devices to determine the presence, and if present, the distance and/or position of an object within an enclosed space. Normally, such a device comprises a scanning means, which is of a type operative, in the presence of a target object, to project a beam of light having a frequency which varies as a function of time. The time variation may be, for example, linear or sine wave. This projected beam then encounters and interacts with

the target object thereby to generate a reflected beam having a frequency which is dependent on the position of the target object relative to the scanning means. The frequency of this reflected beam is detected, typically by a second scanning means. The scanning means will generally comprise a pair of transducers which generate a primary (or transmitter) beam, which is reflected by the target object and is received by a receiver transducer. The primary and reflected beams may be guided by a suitable optical train. The object may be moved in the region of the scanning means by any of a number of known means. A scanning assembly of the type described hereinbefore may also be used to detect any hidden target object that may be present within a sealed container, such as a car boot or the like. In addition, the scanning assembly may be used to detect the presence of a person in a house or building. In particular, such a scanning assembly may be used for the detection of a person in a house or building, which may lead to the automatic opening of the doors and the closure of the windows in order to prevent any unnecessary annoyance to the person. This is particularly useful in the case where the person to be protected is a child or elderly person. Another application of the scanning assembly is as a "pedestrian protection device", in which the scanning means of a scanning assembly is arranged to act as an alarm device. In this case, the scanning assembly is arranged to be sensitive to an approaching person, and to generate a warning signal. The warning signal may be b7e8fdf5c8
