Medial temporal lobe metabolism in young healthy smokers. Spontaneous noninvasive regional cerebral glucose metabolism was studied with positron emission tomography in three groups of young healthy subjects: 10 current smokers (10 subjects), 10 former smokers (10 subjects) and 10 non-smokers (10 subjects). Current smokers and former smokers showed decreased medio-temporal metabolism compared with non-smokers. Other foci of decreased metabolism were also present in the occipital and frontal lobes. These changes appear to be reversible in former smokers, and to be more prominent in current smokers. Sponsored Pages Blog Stats Up in the Air – 5th June – Cup Quarter-Finals The end of the week is approaching fast and I had agreed with Mr JD about his suggestion that we should have a quick end-of-week catch up on all the games so far during the week. There are, as usual, a lot of games going on in the cup. Here's what I've seen, with commentary from Mr JD where he can be heard – unless otherwise stated. All the results were given at the time of writing. I'll start with the two Scottish clubs; St Mirren Thistle (D2) beat East Kilbride 6-0. Livingston (H) beat East Fife 4-2. Alloa beat Stranraer 1-0.
