What's New in the Aspose.BarCode For SharePoint?

This product is a wrapper component for the ASP.NET Framework Microsoft .NET Framework ASP.NET component. It provides developers with a set of functions and control components that they can use to implement barcodes in their applications. The barcode component provides basic methods and properties to generate, read, and modify barcodes, and displays a user-friendly barcode in a list or item that enables end users to display and read barcodes. Developers can use the component to design barcodes for their SharePoint applications and then create the barcodes using the Visual Studio IDE. Implementation Aspose.BarCode for SharePoint: Aspose.BarCode for SharePoint is a set of components for generating, reading, and modifying barcodes in SharePoint applications. The component supports the following barcode types: Code39, Code93, Code128, EAN13, EAN14 (SSCC14), EAN8, UPCA, UPCE, BooklandEAN, MSI, Code11, Codabar, Interleaved2of5, Standard2of5, Postnet, Planet, SSCC18, PDF417, QR, DataMatrix. The barcode component provides basic methods to generate and read a barcode with a specified layout. Developers can also modify the layout of a barcode by applying text, graphics, or other content to the barcode. In addition, the component can display a user-friendly barcode in a list or item in SharePoint in a few mouse clicks. Features This component is designed for SharePoint applications and provides developers the following features: Graphical user interface for generating, reading, and modifying barcodes in a list or item Documentation and sample code Intelligently detects barcode types with a single line of code Images that are created using the component can be accessed via methods Supports multiple format rendering Supports negative number printing Can generate barcodes with any graphic, text, or a combination of text and graphics Supports multi-language localization Supports native Word 2007 localization Supports custom layout by using various components, including Frame, Line, Spot, Text, Image, and Footer Contains a Code39 barcode generator Contains a Code128 barcode generator Allows barcodes to be generated in a header or footer of a SharePoint list or item Allows barcodes to be rendered as a background image Supports multiple text overlay Supports multi-object type rendering Generates a barcode without any
